

FRATUS[®]

PAVIMENTAZIONI

INTRODUCTION

The company **FRATUS PAVIMENTAZIONI SRL**, which its registered office is in Palosco (BG), via Don Lorenzo Milani n.6, trades in planning and creating pedestrian and driveway paving using natural stones. The company has been working since 1983 and throughout the years it has been specialized in paving works such as cobblestones, flagging and paving slab, mainly using materials like porphyry, luserna, granite, beola, marble, quartz-sandstone employed in different formats for directly acquired private or public buyers which often asked our products in order to complete the Street furniture.

The company **FRATUS PAVIMENTAZIONI SRL** has available a group of specialized people in order to carry out small or large size works using mechanical means such as excavators, grain carriers with crane and so on. When the company is full of work and more engagement is required in order to complete an order before the deadline, the company also makes use of external collaborators that have been working with our staff for many years. However, also in this situation the **FRATUS PAVIMENTAZIONI SRL** is the only responsible for works.

To balance quality and price

Every works are the true evidences of quality and price. Thanks to the synergy with Petra, the company of the group mainly specialized in the trading of raw material, we analyze every necessity in order to offer the required characteristics (resistance, aesthetic factors, ecc...), with the complete respect of the economic factors that the project requires. The wise use of the materials and the allocation of provisions according to the different orders, allow us to keep in the course of time a high quality, optimizing prices at the maximum.

Style and convenience

Thanks to 30 years of experience and the constant involvement in high profile projects (Prada, Roberto Baggio, Antonio Ricci ecc..) we are able to guarantee to our partners very exclusive solutions with high content. The aesthetic factor represents an important result but we direct our attention also to the physics aspects of paving. To combine the aesthetic quality and solidity means create exclusive works, ready to face the time and requests they have been projected.

Restoration works

Not only projects and creation made to measure of customer but also restoration and maintenance of pre-existing paving. Thanks to our experience we are able to intervene in a very rapid way without devastate the urban routine, regenerating ruined paving because of weather conditions and utilization giving them beauty again.

The guarantees in the service of the professional

Each work is exclusive. By analyzing the contest, the aims and the style of the project with attention, we can propose to our costumers very efficient solutions. The laying represents only the last part of our work. Aware of your responsibility, our most important duty is to guarantee a technical, precise and the most similar to your trends of planning support.

A true synergy

Our best works are the result of an important cooperation with best planners. From large public works to small private home the aim is to create something exclusive and inimitable.

The request of work and the turnover has been registering a positive trend over the years. In fact, new costumers are increasing and our production capacity can reach also 6.000 square meters in a month (this strictly depend on the period and the season of the year because of weather conditions).

We are also certified SOA in the category OG3 class III and in the category OS26 class I.

We indicate some references to the most important works we made to public and private corporations:

University of Bucaresti (Romania) - square

Private villa - Switzerland, Marly
